AjiPure™ Instantized Branched-Chain Amino Acid & L-Glutamine to help muscle recovery, AjiPure IBCAA is the result of unique production technology allowing it to dissolve more quickly in water, and become available in the body more rapidly. 100% non-animal-origin ingredients and 99-100% purity.

IG-F Growth Factor Rich ImmunoLin® is an all-natural concentrated source of immunoglobulins and other immuno-proteins. These proteins, or antibodies, are naturally produced by the human immune system to help prevent illness and infection. Immunoglobulins are one of the most important products of the immune system. They are a highly specialized class of proteins that give our immune systems an infinitely diverse way to recognize and dispose of anything that can cause sickness.

Aminogen® is clinically proven to increase amino acid levels and boost nitrogen retention. A patented designer enzyme which breaks down protein and improves amino acid absorption, ideal for increasing lean body mass and strength and promoting deep muscle recovery.

Recombinant™ with **CLA** (Micro-Encapsulated Conjugated Linoleic Acid), **MCT's** (Medium Chain Triglycerides) for muscle energy, fat burning and improved immune function. Enhanced with vitamins, minerals, and fiber keeping you healthy and strong. Perhaps the most important thing a protein drink needs is great taste. Fight Labs™ went the extra round using natural flavors, without unnecessary sugars.
